

IGEL Business Continuity Partnered with R-Com Consulting

Navigating the Complex Digital Landscape

We, R-Com Consulting understand that robust business continuity and disaster recovery (BCDR) strategies are essential. This briefing introduces how the IGEL Business Continuity and Disaster Recovery solution, when paired with the versatile IGEL UD Pocket, offers a comprehensive, flexible, and secure approach to ensuring your organisation's resilience and enabling immediate access to critical systems, no matter the circumstance.

Robust Business Continuity & Disaster Recovery:

Rapid Recovery:

Quick access to virtual desktops minimises downtime.

Secure Access Anywhere:

Employees can access their workspace from any device, ensuring productivity during outages.

Streamlined Management:

Centralised management simplifies IT operations and eases support team burdens.

Cost-Effective Preparedness:

Leverage existing hardware to lower disaster recovery costs.

Enhanced Security:

Consistent security policies and compliance are maintained across all endpoints during recovery.

Robust Business Continuity & Disaster Recovery:

Enhanced Security on Personal Devices:

Safeguard corporate data by isolating work environments on personal devices (BYOD) with the UD Pocket.

Cost-Effective Flexibility:

Utilise existing or personal devices for remote work, avoiding the need for dedicated hardware while ensuring enterprise-grade security.

Instant Secure Endpoint:

Convert any 64-bit, x86 device into a secure endpoint using IGEL OS via the UD Pocket.

Work from Anywhere:

Grant employees secure access to virtual desktops and cloud workspaces on any hardware.

Centralised Management:

Manage UD Pocket devices centrally through IGEL UMS to maintain consistent security and policy enforcement for remote workers.

The IGEL Advantage for RCOM Consulting Clients

By integrating IGEL's BCDR capabilities with the adaptable UD Pocket, RCOM Consulting can help your business:

Boost Resilience:

Develop a strategy to endure and recover from operational challenges.

Increase Agility:

Support a flexible workforce, in-office or remote.

Cut IT Costs:

Use existing hardware to avoid major new investments.

Simplify Management:

Centralise endpoint control for easier IT administration.
